Summary

Generative AI & Full-Stack Engineer with a proven track record of translating cutting-edge AI research into enterprise-grade production systems. Currently pursuing an MSc in Computer Science and Engineering (AI & Algorithms) at DTU, with advanced research focusing on RAG, GraphRAG, specialized LLMs, and automated content generation. Demonstrated expertise in architecting scalable AI microservices, implementing modern AI standards, and driving CI/CD pipelines across cloud-native environments (AWS, Docker, Jenkins). Adept at bridging the gap between data science, domain expertise, and software engineering to deliver high-impact AI solutions. Passionate about leveraging frontier AI technologies to optimize workflows, ensure model governance, and create tangible value for large-scale stakeholders in healthcare and enterprise sectors.

Work Experience

- Dictus** Copenhagen, Denmark
Software Developer Aug 2023 - Now
 - Architected and deployed AI-powered features, including an LLM-driven resume generator, taking use-cases from ideation to production.
 - Engineered robust full-stack applications using C#/.NET, React (TypeScript), and Python AI microservices, ensuring seamless integration of GenAI into enterprise workflows.
 - Implemented advanced speech AI solutions, including Automatic Speech Recognition (ASR) and speaker diarization, optimizing models for real-world audio processing.
 - Managed end-to-end CI/CD pipelines using Docker, Git, and Jenkins on remote infrastructure, enforcing best practices for version control and deployment.
 - Collaborated with cross-functional teams to deliver and maintain large-scale, high-availability applications for the Norwegian Parliament (Stortinget).
- Dictus** Copenhagen, Denmark
Software Developer Intern Aug 2022 - Aug 2023
 - Developed a full-stack crowdsourcing web platform for audio data collection using C#/.NET, Python, TypeScript, and React.
 - Designed and deployed a Bachelor-level AI application integrating deep learning models for ASR and speaker separation, directly contributing to enterprise data pipelines.
 - Collaborated with product and engineering teams to rapidly prototype and iterate on AI-driven audio processing features.
- Tradir.io** Copenhagen, Denmark
Software Engineer Dec 2020 - Aug 2021
 - Engineered scalable CRM backend services in an agile environment using Python, Django-REST, and PostgreSQL.
 - Integrated multiple third-party API providers (Mailgun, Nylas, Nanonets) to streamline business processes and enhance data flow.
 - Deployed and maintained cloud-hosted applications on AWS, adhering to modern software development and CI/CD practices.

- **Greenwood Engineering** Copenhagen, Denmark
Student Worker *Aug 2021 - Sep 2022*
 - Designed and maintained virtual machine infrastructures hosting critical internal tools (Git, Jenkins, Wiki) for engineering teams.
 - Executed server provisioning, lifecycle management, and hardware recycling initiatives to optimize IT infrastructure efficiency.
- **Widex** Copenhagen, Denmark
Firmware Updater *Feb 2019 - Oct 2019*
 - Performed precision firmware updates on newly manufactured hearing aid devices, ensuring compliance with medical device standards.
- **Power** Copenhagen, Denmark
IT-Support *Sep 2016 - Oct 2017*
 - Delivered comprehensive IT support and customer service, managing device setups, troubleshooting, and data recovery operations.

Projects

- **AI Audio Transcription & Crowdsourcing Platform** *Aug 2022 - Aug 2023*
Full-Stack AI Developer
 - Engineered a full-stack web application leveraging deep learning models for Automatic Speech Recognition (ASR) and speaker separation.
 - Built a crowdsourcing data collection platform to acquire and manage high-quality audio datasets for model training and evaluation.
 - Integrated Python-based AI microservices with a TypeScript/React frontend to deliver a seamless user experience for audio processing and analysis.

Education

- **Technical University of Denmark (DTU)** Copenhagen, Denmark
MSc Computer Science and Engineering (specialization in AI and Algorithms) *2024 - 2026*
- **Technical University of Denmark (DTU)** Copenhagen, Denmark
BSc Computer Engineering *2019 - 2023*
- **Hanyang University** Copenhagen, Denmark
Exchange Program (Computer Science) *2020 - 2021*

Technical Skills

C#, Python, TypeScript, JavaScript, React, ASP.NET, Django REST, FastAPI, Node.js, Java, C, SQL, MySQL, PostgreSQL, AWS, Google Cloud Platform (GCP), Docker, Jenkins, Git, RabbitMQ, DVC, HuggingFace, PyTorch, Scikit-Learn, WandB, Prompt Engineering, Large Language Models (LLMs), RAG, GraphRAG, Knowledge Graphs, Automatic Speech Recognition (ASR), Speaker Diarization, Whisper, Wav2Vec, Vector Databases & Semantic Search, CI/CD Pipelines, Agile Methodologies, API Integration, Cloud-Native Architecture, GenAI Integration, Model Benchmarking & Evaluation, Infrastructure Management

Languages

Danish: Native

English: Professional Working Proficiency

Korean: Low Intermediate
