Summary

Senior Software Engineer with over 5 years of expertise in developing scalable, high-availability applications and optimizing complex software ecosystems. Proven track record in driving operational efficiency through AI-driven enhancements, including a 25% boost in quote conversions. Expert in full-stack development, cloud technologies (AWS, GCP), and modern CI/CD workflows using GitHub Actions. Highly skilled in streamlining developer productivity by optimizing CLI performance and automating package management. A dedicated collaborator experienced in working within large-scale monorepos and multi-brand platforms to deliver high-quality, production-ready software solutions.

Work Experience

- The Home Depot** Tijuana, B.C., Mexico
Senior Software Engineer Jul 2024 - Now
 - Driving innovative solutions on the MyView team to enhance operational efficiency for thousands of store associates.
 - Boosted quote conversion by approximately 25% through the implementation of AI-driven enhancements.
 - Developed a data-rich dashboard utilized by over 1,000 store associates for real-time operational insights.
 - Upgraded 80+ test suites from Enzyme to React Testing Library, increasing code coverage by 20% and reducing production bugs by 15%.
- Expedia Group** Tijuana, B.C., Mexico
Senior Software Development Engineer Oct 2022 - May 2024
 - Played a key role on the Bernie platform team, streamlining developer workflows and improving performance across multiple Expedia brands.
 - Reduced CLI command execution time by 50% and cut overall build times by 20%.
 - Migrated CI/CD pipelines to GitHub Actions, significantly streamlining release cycles and reducing deployment overhead.
 - Automated package updates using Renovate, eliminating manual dependency management tasks.
 - Implemented snapshot testing within the monorepo architecture, saving approximately 4 hours of manual effort weekly.
- Expedia Group** Tijuana, B.C., Mexico
Software Development Engineer Mar 2021 - Oct 2022
 - Contributed to Hotwire's Platform and the Cruise Customer Experience team, focusing on data-driven enhancements and reusable UI components.
 - Optimized GraphQL queries, boosting data retrieval speed by 20% across key Cruise domain pages.

- Designed and implemented reusable UI components for Lodging, Flights, Packages, and Cruises to ensure design consistency.
- Reduced shared package bundle sizes to enhance frontend performance and loading speeds.
- Accelerated the migration of partner-facing applications, effectively halving developer onboarding time.

- **Prismview**

Tijuana, B.C., Mexico

- *Software Engineer*

Aug 2015 - Jun 2020

- Developed and maintained high-availability software for large-format LED display systems.
- Maintained 99.9% uptime for mission-critical LED display systems in commercial venues.
- Enhanced Banner CMS features, leading to a 30% reduction in customer-reported issues.
- Reduced the bug backlog by 25% through rigorous triaging and efficient debugging processes.

Education

- **Universidad Autónoma de Baja California**

Tijuana, B.C., Mexico

- *B.S. Electronics Engineering*

Aug 2015 - Jun 2020
